

## ICT for Multifamily.

As a developer, you are the architect of vibrant communities, shaping the lives and experiences of countless residents through your decisions. It's a big job, and there are enough regulations, stakeholders, and moving parts to manage without the stress of adding a bunch more complexity just to tick off security.

### That's where ICT comes in.

- > One solution to protect your biggest asset, so staff and residents feel safe, from the lobby to the lounge
- > A unified access, security, and building automation solution from a single supplier that's easy to manage without having to jump between systems
- > Just one smart credential to go anywhere – with a user experience that delivers convenience, increases retention, and enhances property value

### Key features.

- > **For residents , convenience is key.** Go anywhere with just one credential. Elevate residents experience so they can open the wireless lock on the apartment door and access the parking garage, lobby, elevator, and any common areas in between – all with a single card or mobile key. A visitor can use the intercom to initiate a video call with the resident, who can conveniently grant access remotely via their phone with the mobile app.
- > **Property management made easy.** Time is money and an ICT solution can significantly enhance efficiency for property managers. By streamlining and centralizing user management while offering customizable, automated building functions, these systems deliver seamless control and long-term productivity gains. Manage and control users and functions from the web-based platform or the on the go with the mobile app.
- > **Customizable to your needs.** Need sensors for wireless leak detection? ICT's open technology and wide range of third-party integrations help increase the intelligence of your building and address any unique needs. Integrate with a leading property management system and further enhance the experience for staff, residents, and visitors.

## Protege WX.

“WX is by far one of the least complicated systems I have ever programmed. Not only is the support epic, but the product allows a quick and easy transition to my clients.” - Phillip Hahn, C&S Specialty Systems.

The Protege WX system is the ideal solution for multifamily properties, combining access control, intrusion detection, and building automation into one streamlined platform. With a web-based interface and mobile app, property managers can easily oversee and manage access, security, and automation from anywhere. Designed to simplify operations, Protege WX seamlessly integrates these functions, saving time, reducing costs, and enhancing the safety and convenience of multifamily living spaces.

## Who we are.

We believe in the confidence and peace of mind that comes from a feeling of true security.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. - **Hayden Burr, Founder & Chief Innovation Officer, ICT.** ”

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
