

What is Symphony?

BRAXOS

Symphony

Streamline physical access management in multi-tenant properties with braXos Symphony. We eliminate friction by synchronizing user credentials and access privileges in real-time throughout Corporations, Education, and Commercial or Residential real estate portfolios.

Exceptional access control through flexible identity management and synchronization /

Physical security in property management requires dynamic and reliable data flow between sources of identity authentication and the devices that enable access across a company's property portfolio. Through braXos Symphony we provide physical and mobile access management whether your enterprise occupies a single building or multiple campuses around the world. Through one platform interface, tenants and property managers can issue, monitor, and revoke credentials via both traditional keycards and smartphone mobile devices, tailoring deployments for flexibility and convenience. Symphony integrates seamlessly with existing access control systems and offers robust API capabilities for specific use cases, tailored to unique property and tenant requirements.

With over 150 connectors to access control systems and device manufacturers, braXos Symphony provide ultimate variations that can redefine harmony in your property access management.

Benefits: /

- Enables centralized security with real-time access control issuance and synchronization.
- Provides streamlined operations through unified credential management.
- It saves security teams time and resources by creating a single point of control across all properties.
- Facilitates enhanced tenant and guest experience with smartphone-enabled access.
- Extends easy access to common areas, parking, vending machines, and individual offices or units for improved user experience.
- Scalable from individual buildings to global property ecosystems.

Whether managing residential or commercial office properties, braXos Symphony delivers the connections that enable secure, efficient, and future-ready access control without requiring expensive system replacements.
