

ICT for Local Government

Councils require a solution that not only keeps their staff and the general public safe and secure, but that also streamlines city operations, creating a better area in which to work, go to school, and live. Complex, unscalable, and antiquated systems can mean this isn't possible.

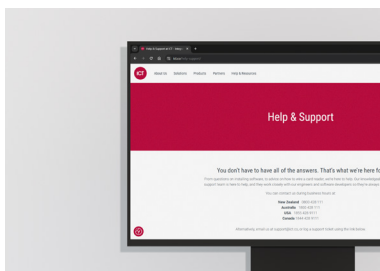

That's where ICT comes in.

Key features

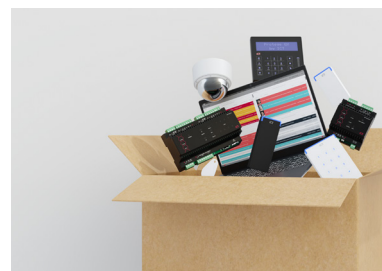

Made to last

Cities have a lot of budgets to balance and replacing hardware every year isn't an option. From the encapsulated design of the DIN Rail controller to vandal-proof accessories for our readers, ICT hardware is made to last and endure.

Comprehensive support

From the training courses to global technical support that goes beyond 9-5, we're here to support your municipality and growth. Our dedicated team is happy to work with you to create a seamless upgrade that doesn't disrupt services.

Custom solutions

Connect seamlessly with our extensive range of integration partners, from video management systems to wireless sensors. Prefer a tailored approach? Leverage our custom tools to build a solution that fits your unique needs.

Case Study: City of New Britain

“I’d definitely recommend ICT to other municipalities, it’s such a user-friendly access system.” - **Jon Delgadillo, Director of Support Services at City of New Britain.**

New Britain, Connecticut, USA, is a thriving city with an aging access control system that was no longer fit for purpose.

Mammoth Security, ICT-certified installers, received glowing reviews after successfully integrating access control for 90 doors, plus security and CCTV systems, at City Hall. The mayor was so impressed that when construction began on the new Public Works Operations Center, extending the existing Protege GX system to the new facility was an easy decision. The unified system streamlines the management of access, security, and integrations across the city, while its durable, high-quality hardware ensures a reliable, long-term solution that keeps the city running smoothly and its residents safe.

Who we are

We believe in the confidence and peace of mind that comes from a feeling of true security.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. - **Hayden Burr, Founder & Chief Innovation Officer, ICT.** ”

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
