

Education.

ICT for pre-schools.

Overworked and under-resourced school staff are struggling with outdated, complex, and proprietary access control and security systems that demand technical expertise to use and update. Directors, teachers, and administrators need a user-friendly system that ensures the safety of children and staff, offers oversight and control, and is customizable to their specific requirements—all without increasing their workload.

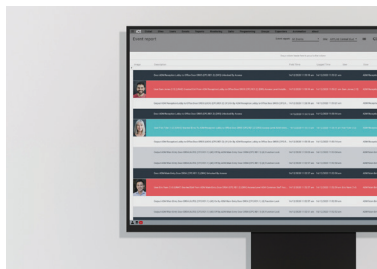

That's where ICT comes in.

Key features.

Door lockdowns.

Customizable, pre-programmable lockdowns. Instantaneous, simple, with automatic alerts to emergency response, and able to be triggered in 8 different ways – from a hardwired panic button to the phone in your pocket.

Reports.

Get the information you need, when you need it – automatically generate scheduled reports and have them emailed to a pre-set user, for simple but robust oversight.

Complete oversight.

Get complete oversight and control from one dashboard. Visual maps that allow you to control your building, pop-up alerts for events, and targeted information, all on one screen.

Solution overview.

In the United States, sits an independent pre-school who were awarded a city grant to revamp their access control and security. Phase one of the project included creating a full building lockdown solution – 14 external and internal doors were connected to the Protege system and set up to require badge access to gain entry, ensuring a fully secure building. Each room in the pre-school was setup with a hardwired lockdown button – one press and the entire building would instantly go into lockdown, while at the same time a signal would be sent to the monitoring station to dispatch emergency services.

Before:

- > Completely open building, where anyone could gain access
- > Unable to track who was coming in and out of the pre-school
- > Back of mind worries for teachers and parents alike

After:

- > Every door is controlled by a reader connected to the Protege system
- > Easily monitoring of who's accessing doors, with pop up events for denied access
- > Teachers and parents both gain peace of mind knowing students and staff are protected
- > Able to scale as required and integrate new technologies as needed

Who we are.

Just like educators, we believe that once people feel safe and secure, they can truly succeed.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. - **Hayden Burr, Founder & CEO, ICT.** ”

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
