

## What is Composer?

BRAXOS

### Composer

Composer streamlines organizational workflows and automates physical access onboarding and offboarding by unifying HR authoritative source data, addressing business, compliance, and security rules in one platform. Seamlessly integrate with existing systems requiring access. Composer automates repetitive tasks, eliminates errors, and controls access in near real-time, allowing your security team to focus on higher-value work.

### Your foundational platform for access workflow automation and security efficiency /

Experience a new standard of efficiency and security with braXos Composer, a powerful workflow automation platform designed to streamline and harmonize your organization's most critical physical security processes. Whether you're managing physical access controls, HR onboarding or the retiring of credentials, visitor management, access to parking or vending machines, or business continuity rules and alerts, Composer provides the flexibility and intelligence you need to automate and optimize every step.

With Composer, manual data input and duplication of effort become a thing of the past. Seamless integrations ensure that data flows smoothly across your enterprise physical access ecosystem – so you can eliminate redundant processes and reduce human error.

### Benefits /

- Enables centralized security with real-time access control and monitoring.
- Handles complex large-scale enterprise workflows with multiple dependent or parallel steps.
- Offers ready-made integrations with popular systems (access control, elevators, intercoms, notifications, cloud services) via the extensive braXos connector library.
- Provides bidirectional person record management and synchronization across integrated systems.
- Allows for tailored security workflows through user configurable business logic.
- Enables real-time event management for enhanced proactive security responsiveness.
- Supports multiple instances on one virtual server, plus full cloud, on-premise or hybrid options.

- Maintains software compatibility with newly released versions of installed systems, ensuring ongoing workflow operations.

With Composer, transform the way you all essential physical access processes are unified under one intelligent platform. Achieve the perfect harmony of automation, collaboration, and security – empowering your organization to operate with greater agility, confidence, and control.
