

The Benefits of a Vault and ATM Integration

Bank managers, administrators, and security teams carry a significant responsibility: **protecting and growing customers' assets** while preserving their trust in your institution. Despite the technological advancements of the 21st century, managing a financial institution has only become more demanding. Banks face mounting challenges from outdated, fragmented, and proprietary access control and security systems that complicate compliance and make daily operations increasingly burdensome.

Strengthen your banking security infrastructure and ensure peace of mind for staff and customers by integrating Protege GX with leading ATM Cash Vault Security Systems.

Increase security and visibility

Maximize visibility and ensure security with a seamless vault and ATM integration. Access real-time insights across ATMs, cash safes, and teller cash recyclers from a single intuitive dashboard. Industry-leading features such as built-in two-factor authentication via Cencon, combined with native bank security functionality in Protege GX like vault disarm delay, and automatic re-arm capabilities offer unmatched asset protection. Stay informed with immediate alerts for all critical events, ensuring swift action when it matters most.

Streamline operations

Experience unparalleled efficiency with advanced vault and ATM integrations tailored for financial institutions. Eliminate the hassle of manually changing combinations, managing users, and retrieving audit information. This streamlined approach reduces labor costs, enhances operational efficiency, and provides a scalable solution to support your institution's growth. Simplify the management of your ATMs, safes, and cash devices while optimizing resources, enabling you to focus on delivering an exceptional customer experience.

Unified bank security solutions

Our open platform is designed for ultimate flexibility, allowing you to customize it to fit your unique needs while integrating seamlessly with your existing infrastructure. With our extensive line-up of integrations with video management systems, biometrics, or sensors and detectors, you can build the financial institution security solution you need, while reducing workload for staff thanks to the single pane of glass view from Protege GX.

Who we are

We believe in the confidence and peace of mind that comes from a feeling of true security.

My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution.

- Hayden Burr, Founder & Chief Innovation Officer, ICT.

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
