

# Benefits of a Power Supply Unit

ICT provides a range of Power Supply Units (PSU), including 5-amp and 10-amp models, which are designed to deliver reliable performance tailored to your power needs.

## Key benefits:

- > **Greater value.** A scalable, high-performance option that maximizes return on investment, ICT's PSU are designed to support more devices from a single source
- > **Increased safety.** Keep your Protege system running smoothly during extended power outages with a hassle-free battery replacement, made effortless by its enhanced design.
- > **Get back time.** Save time effortlessly with the intuitive plug-and-play design – simply click in place.
- > **Save space.** Maximize space efficiency with ICT's innovative DIN Rail Power Supply Units. Designed to fit seamlessly into standard HVAC and electrical switchboard cabinets or enclosures, they help your customers save valuable real estate.
- > **Built to last.** The enclosed design provides more durability and protects internal circuitry from physical damage or electrostatic discharge
- > **Status at a glance.** Get the information you need quickly, without having to search through a system or a manual with the built-in LED display on the front of the unit.

## Who we are

We believe in the confidence and peace of mind that comes from a feeling of true security.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. ”

- Hayden Burr, Founder & Chief Innovation Officer, ICT.

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
