

Education.

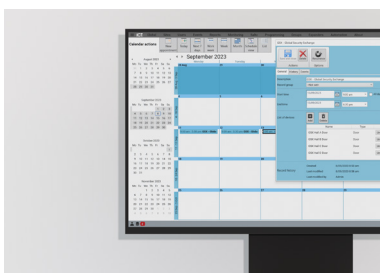

ICT for post-secondary.

Over-worked school staff are struggling against outdated, complex, proprietary, and fragmented access control and security systems that require tech expertise to use and update. Administrators and school security require a system that keeps **students, visitors, and staff safe**, allows oversight and control, and is customizable to their unique needs – all without adding to the workload.

That's where ICT comes in.

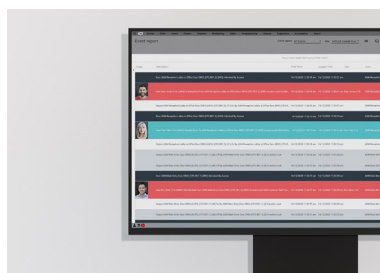

- > We keep your students, staff, and school safe and secure
- > Experience seamless access and security without the need for technical expertise or cumbersome systems, so you can focus on what really matters
- > Complete customizability means great value and return on investment – we fit with your unique needs and environment

Key features.

Schedules.

Create custom scheduling options across your campus, for the 24/7 on campus fitness centers, classrooms only open for a few hours a day, or a one-time community event. Easily oversee and modify schedules with the intuitive calendar design.

Reports.

Get the information you need, when you need it – automatically generate scheduled reports and have them emailed to a pre-set user, for simple but robust oversight.

Complete oversight.

Get complete management and control from one dashboard. Get pop-up alerts for events and visual maps that allow you to control your entire campus – whether it's one building, a full multi-block spanning campus, or even across different cities – all on one screen.

Case study.

On the western coast of Canada sits the **University of British Columbia (UBC)**, a global center for teaching, learning and research. Consistently ranked among the top 20 public universities in the world, UBC has a daytime population of 75,000 students and staff, however its aging security system was struggling to keep up with the demand of a modern institution.

Before:

- > Problems with reliability and vulnerabilities
- > Unable to scale
- > Legacy products lacked modern features

After:

- > Unified security solution
- > IP Reporting
- > Integration to Student Management system and elevators
- > Compact DIN rail installation reduced wall space by 70%

Who we are.

Just like educators, we believe that once people feel safe and secure, they can truly succeed.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. - **Hayden Burr, Founder & CEO, ICT.** ”

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
