

## What is Crescendo?

BRAXOS

### Crescendo

Crescendo provides secure vertical floor access control and hands-free elevator dispatch solutions for any type of workplace, and residence, or hotel. With connectors to all major elevator manufacturers' protocols, Crescendo delivers seamless vertical transportation security – wherever your passengers need to go.

### Vertical access management taken to new heights and greater flexibility /

In today's security landscape, guarding only the exterior doors of a building or floor is no longer sufficient. True security requires vertical protection as well, ensuring that unauthorized individuals cannot travel freely to restricted floors. But the experience of those with valid credentials should be easy and frictionless, regardless of their destination. That's where braXos Crescendo makes all the difference.

Crescendo features connectors that integrate with all the major elevator manufacturers to deliver a seamless, secure tenant, resident, or guest experience, blocking unauthorized access to protected floors, and facilitating access for those with valid permissions. Crescendo also supports over 40 ACS platforms, Intercom systems, parking management, or other touchpoints in the vertical environment, via our connectors, allowing braXos to unify one or multiple systems into a single, harmonized vertical access ecosystem.

Further, elevate your building's user experience with Crescendo LiftOff, the revolutionary hands-free elevator mobile dispatch solution for modern properties. Designed to deliver secure, touchless vertical transportation, and tailored to your company's unique requirements.

### Benefits /

- Provides seamless integrations to allow or restrict specific floor access via credentialing with real-time monitoring.
- Integrates with major elevator manufacturers and access systems for streamlined user management, and maximum flexibility.
- Makes managing buildings with multi-tenant companies or user groups easy and less time consuming.
- Assigns access permission by role, visitor status, time-based rules, or special privileges.

- Enables touchless elevator dispatch or automatic scheduling of car calls.
- Supports mobile versatility directly for both iPhone and Android users on smartphones or smartwatches.
- Enables elevator access feature integration into existing property apps, for maximum convenience in the user experience.

With Composer, transform the way you all essential physical access processes are unified under one intelligent platform. Achieve the perfect harmony of automation, collaboration, and security – empowering your organization to operate with greater agility, confidence, and control.
