

Protege Cartridge Mortise Wireless Lock.

The Protege Cartridge Mortise discreetly conceals lock hardware by enclosing all electronic components within the door, offering a sophisticated security solution while maintaining an elegant aesthetic.

Key benefits:

- > **Unified.** Bring access control and security together in one system and give tenants peace of mind, while simplifying oversight and management
- > **No cables.** With no door cabling necessary you can deploy integrated electronic access control in areas where traditional wired locking solutions may not be possible and online connectivity may be a barrier, allowing businesses to reduce labor and materials costs significantly
- > **Easy installation.** Thanks to the purpose-built Mobile Configuration App and ICT construction cards, installing a Protege Wireless Lock is as easy 1, 2, 3.
- > **One card solution.** With wired tSec card readers and Protege Wireless Locks, you can use a single smart card/fob or ICT Mobile Credential to access through a multi-tenant building and Protege secured apartment
- > **Customizable style.** At ICT we believe your access control solutions should seamlessly blend form and function. That's why we offer customization options from reader shape and color, to handle design and finish
- > **Status at a glance.** With different colors available to signal different modes and setting, the integrated LED indicator provides a read response and status signaling, so you can see whether the lock is unlocked or locked at a glance
- > **Optional accessories.** Tailor the lock to suit your needs with optional accessories for interior deadbolts and key overrides

What is a Cartridge Mortise Lock?

The 'Mortise' is the rectangular pocket cutout of the door that the lock body fits into. Above this is a second pocket cutout that fits the 'Cartridge', which includes the batteries and the electronics. With the electronics hidden inside the door, the Cartridge Mortise is refined and modern while also providing a world-leading apartment security and access control solution.
