

Education.

ICT for K-12.

Overworked and under-resourced school staff are struggling with outdated, complex, and proprietary access control and security systems that demand technical expertise to use and update. Principals, administrators, and school boards need a **user-friendly system** that ensures the safety of students and staff, offers oversight and control, and is customizable to their specific requirements—all without increasing their workload.

That's where ICT comes in.

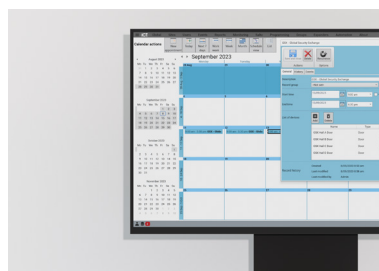

- > We keep your students, staff, and school safe and secure
- > Experience seamless access and security without the need for technical expertise or cumbersome systems, so you can focus on what really matters
- > Complete customizability means great value and return on investment – we fit with your unique needs and environment

Key features.

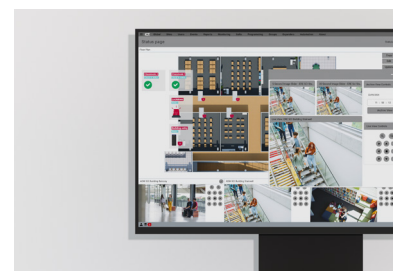

Door lockdowns.

Customizable, pre-programmable lockdowns. Instantaneous, simple, with automatic alerts to emergency response, and able to be triggered in 8 different ways – from a hardwired panic button to the phone in your pocket.

Schedules.

Create custom scheduling options, whether it's a recurring after-school program or a one-time snow day. Easily oversee and modify schedules with the intuitive calendar design.

Complete oversight.

Get complete oversight and control from one dashboard. Visual maps that allow you to control your building, pop-up alerts for events, and targeted information, all on one screen.

Real-world example.

After merging several smaller school boards, a central Canadian school district encountered challenges in access, security, and operations, as each school previously operated independently. Initially tasked with creating a cohesive access management solution across the district, the board also went on to select Protege for their security needs. This choice established a unified approach that streamlined operations and enhanced security efficiency, setting a new standard for district-wide safety management.

Before:

- > Schools using standalone methods for access control, including traditional keys
- > No true oversight and control from the board level
- > Lack of scalability and future-proofing

After:

- > Able to monitor the nearly 200 strong school district from one cohesive interface
- > Cost-effective solution thanks to the unified system for access and security
- > Able to scale as required and integrate new technologies as needed

Who we are.

Just like educators, we believe that once people feel safe and secure, they can truly succeed.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. - **Hayden Burr, Founder & CEO, ICT.** ”

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
