

Benefits of a Sensor and Detector System Integration.

Property owners and managers need to ensure the safety of anyone who comes through their doors, protect their properties 24/7, keep operational costs low, and not overburden their staff with monitoring - it's a big demand that is only getting bigger as tenant expectations continue to rise.

Whether it's wireless pendants for staff, a laser scan detector at the cabinets, or hundreds of security sensors across an entire site, keeping tenants, property, and assets secure has **never been easier**.

Enhance Security and Safety

Increase safety with advanced integrated sensors and detectors, designed to secure even the most challenging spaces with ease and reliability. With the ability to manage sensors and detectors from one dashboard and real-time alerts able to be sent directly to your phone, you'll always stay one step ahead.

In the event of an emergency, a simple button press on a wireless pendant can notify emergency services instantly, creating an effective staff safety solution. Plus, robust audit trails provide vital insights for compliance and operational efficiency.

Smarter Security, Lower Costs

Integrating sensors and detectors into your property doesn't just enhance security, it optimizes your budget. These systems can eliminate the need for security guards, reducing ongoing labor expenses while ensuring 24/7 surveillance. With a wireless solution like Inovonics you can cut down on costly installation efforts like running cables and hiring additional contractors. Need to scale up? Adding more sensors or detectors is seamless, allowing you to adapt as your property's needs grow.

Future-Proof Your Building

Unlock unparalleled flexibility and control by integrating sensors and detectors with Protege, creating a smarter, more efficient property. ICT's open platform delivers unmatched flexibility, allowing you to seamlessly integrate it with your existing infrastructure while tailoring it to your unique requirements. Designed for scalability, it lets you customize and expand your system at your own pace, ensuring it evolves alongside your needs and budget. Protege's versatility keeps your building ahead of the curve, so you can build smarter, not harder.

Case Study: UW Credit Union

UW Credit Union, a federally insured financial institution, is dedicated to serving its members with cutting-edge technology. To meet the needs of its branches, they sought a reliable, centralized system that delivered flawless performance while seamlessly integrating out-of-the-box with wireless sensors.

When UW Credit Union discovered the seamless compatibility between Protege GX and Inovonics—allowing Inovonics devices to be controlled directly from the Protege interface—it became the clear choice. The result? A streamlined, efficient security and operations system that **exceeded expectations**.

Who we are

We believe in the confidence and peace of mind that comes from a feeling of true security.

My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution.

- Hayden Burr, Founder & Chief Innovation Officer, ICT.

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
