

Protege 2 Door Expansion Kit

Expansion kits are a convenient and cost-effective option for extending your Protege GX and Protege WX systems. These curated bundles streamline design, simplify ordering and save you time, helping you bring powerful security solutions to your customers faster.

This kit includes DIN rail modules for control of two doors, RS-485 quick-connect cables and a dedicated secure enclosure. To deploy the expansion kit, simply connect it to the RS-485 network of an existing Protege GX or Protege WX controller.

Ordering

Order Code: EK-2D

This kit is only available in North America.
