

Protege Motorized Deadbolt Wireless Lock.

Easy to install and even easier to use thanks to the automatic deadbolt retraction, the Protege Motorized Deadbolt delivers a secure solution that's perfect for both retrofit and new build applications.

Key benefits:

- > **Unified.** Bring access control and security together in one system and give tenants peace of mind, while simplifying oversight and management
- > **No cables.** With no door cabling necessary you can deploy integrated electronic access control in areas where traditional wired locking solutions may not be possible and online connectivity may be a barrier
- > **One card solution.** With wired tSec card readers and Protege Wireless Locks, you can use a single smart card/fob or ICT Mobile Credential to access through a multi-tenant building and Protege secured apartment
- > **Easy installation.** Thanks to the purpose-built Mobile Configuration App and ICT construction cards, installing a Protege Wireless Lock is as easy 1, 2, 3
- > **Status at a glance.** With different colors available to signal different modes and settings, the integrated LED indicator provides a read response and status signaling, so you can see whether the lock is unlocked or locked at a glance
- > **Optional colors.** Tailor the lock to suit your aesthetics by choosing between two finishes.

What is a Motorized Deadbolt Lock?

The Protege Motorized Deadbolt Wireless Lock is a deadbolt lock that meets ANSI Grade 2 lock standards. When an authorized tenant badges their credential at the reader, the deadbolt will automatically retract to allow entry. The interior is operated using a manual thumb-turn to easily unlock and allow exit. It creates an apartment security and access control solution that's as sleek as it is simple.
